

Places to be visited in Kansas City

The application allows users to login with their face book credentials and redirected to home page where we can query for places to be visited in Kansas City. The following features are implemented in the application.

1. Login with your facebook credentials.
2. Enter a search query to get your interested places around Kansas city.
3. Also you can get current weather report of the city.

I have utilized following APIs in my application.

1. Facebook API
2. Foursquare API
3. Openweathermap API
